

# Toy car test

Make a slope for your toy car to travel down by placing a building block under one end of a platform.

Roll your car from the top and measure how far it travels.

Make your slope higher by adding more blocks. Measure how far your car travels each time.

Number of blocks	How far the car travelled
1 block	
2 blocks	
3 blocks	
4 blocks	
5 blocks	

Activities and poster devised by Mark Longmore.
