

Happy shopper

- Collect a range of different carrier bags like the ones given away by supermarkets.
- Go for as much variety as possible – different sizes, different styles and different handles.
- What qualities would customers be looking for in a bag?
- List the ways in which the bags are different.
- Test the strength of the bags carefully using large tins of baked beans. Make sure the test is fair. Record the results on the chart below.

Name of bag	Where the bag broke	Number of tins used

- What qualities did the most successful bag have?
