

How to make a hat

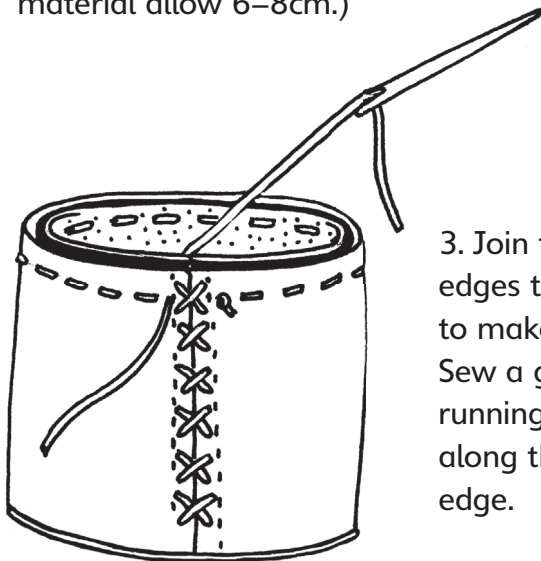

Circumference of head and seam allowance

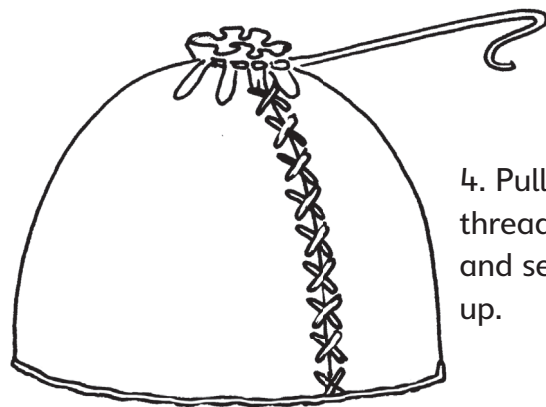

1. Measure round the widest part of your head and add on 4cm to allow for a seam. (If you are using thick material allow 6–8cm.)

2. Place the layers of material in the order shown above. Sew a running stitch around the three edges as shown, then turn inside out to hide the seams.

3. Join the short edges together to make a tube. Sew a gathering running stitch along the open edge.

4. Pull the thread tightly and sew it up.

5. Turn the hat inside out and add decorations: ear flaps, pom-poms, shapes – whatever you want!
