

Trade and transport

Autorickshaws

Autorickshaws are found in India's major cities where the streets are teeming with traffic. People also travel by bus, minibus, taxi, private car, train, bicycle, motorcycle and on foot.

- Draw up a list of advantages and disadvantages for each mode of transport.
- You can use the internet and travel guides to help find out the cost of an autorickshaw journey. How many passengers can it take? How reliable is it?

Buffalo cart

Buffalo carts are pulled in fields and villages across India. They are very useful for carrying crops, tools and people. But buffalo carts are also driven into towns and cities.

- Look at pictures of Indian cities. What hazards do drivers of buffalo carts face? Write these on a mindmap and then draw your findings as a cartoon strip.
